

Antenna Brackets Product Range

Product Description:

The Hills Antenna range of antenna brackets are suitable for the mounting of digital TV antennas on surfaces such as concrete, tile and tin roofs.

The Hills Antenna range also offers heavy duty brackets that are beneficial in areas that face issues such as high wind speeds or where large antennas are used and require extra load bearing capacity due to the weight or size of the antennas.

The antenna bracket range has been hot dipped galvanised for superior corrosion protection.

The range is available in silver galvanised steel finish.

Models:

FB607198

FB607286

FB607287

FB607288

FB607236

*FB607286
