

MBX5710 T2

1-input (III+DAB+UHF) multiband TV indoor amplifier with 31dB gain and up to **125dB μ V output level on UHF band**, separate amplification with independent level adjustment (20dB) for each band and low noise figure. **T2 jumper** with UHF cut band selections switch for LTE 4G @790MHz or 5G @694MHz.

- **T2 technology**: new UHF cut band selections jumper for LTE 4G @790MHz or 5G @694MHz; **LTE 4G and 5G integrated filters to maximize the gain and the signal level**, if compared with an external filter.
- High gain and high output level enable these products to be used in medium-large networks.
- **High shield against LTE interferences (LTE Free)** thanks to the **die-cast housing** with F connectors and die-cast frame that encloses the amplification section.
- Test point -30dB available on all models.
- Jumper for enable the **remote power supply** on all inputs, with an automatic recover **short circuit protection** system and a power status LED.
- **The Serie is equipped with high efficiency and low consumption switching power supply.**
- Special screw for earth electrode of the antenna system connection.

ITEM		MBX5710 T2
Input no.		1
Band		VHF + UHF
Gain	(dB)	43, 43
Gain adjustment	(dB)	20, 20
Noise figure	(dB)	4.5, 7
Output level	(dB μ V)	122, 125
